“WE”

By Ren

Where are we, when are we, why are we, what are we, and who are we?

We are from a connected and living world. Where is a world filled with various humans, nonhumans, and natural entities. We is everything and everything is we.

We are linked through time and space in branching, circular, linear, and nonlinear ways. When is fluid and fixed as are we.

We are created with emotions, expressions, anxieties, despairs, hopes, and legacies. Why is growing, learning, feeling, and being of we.

We are formed through pain, trauma, love, healing, mystery, and choices. What is known and
unknown sense of we.

We are lived actions, behaviors, cultures, beliefs, wisdoms, and stories. Who is more than self
and the conjuring self of we.

We are everything; fluid and fixed; growing, learning, feeling and being; known and unknown;
and more than self and the conjuring self of we.

Ren's Comment: These are my thoughts of when I am in the Wasatch Mountain Range and how
I see we as part of the living planet.
